EXPERIENCE

Zenman, Website Development and Design – Denver, Colorado

Senior Front-end Web Developer | August 2016 - Present

- Led the development team in weekly code reviews, team meetings, and innovative front-end practices to keep the team moving forward
- Mentored junior front-end web developers and assisted with code problems

Front-end Web Developer | May 2015 - August 2016

- Built custom WordPress sites from the ground up with a bare-bones theme
- Developed a WordPress plugin to easily integrate social media feeds using the Facebook, Instagram, Twitter and LinkedIn APIs
- Researched front-end performance measures and how to improve them within WordPress websites
- Worked with many CRM systems to integrate client forms and workflows with their websites

Intern | January 2015 - May 2015

- Developed and maintained WordPress websites while managing their databases
- Learned best practices in web development and business procedures
- Amplified skills in git, command line tools, PHP, SASS and JavaScript libraries

Semantic Arts, Enterprise Information Integration – Fort Collins, Colorado

Web Intern | February 2015 - July 2015

- Worked on various development projects with data and JSON
- Assisted with light Python programming with the Flask microframework
- Increased knowledge of SEO integration with code and Google Analytics practices

The Boston Globe – Boston, Massachusetts

Editorial Designer | January 2014 - June 2014

- Gained digital interactive design and development fundamentals from professional developers in the field
- Designed sports graphics weekly from a set of data and photos to create data visualizations, while collaborating with veteran sports editors and established writers in the media industry
